spwebconnect solutions

*01/2023 - 09/2024*                                    *Pune*

*Tasks*

- I designed and developed user interfaces using HTML, CSS, JavaScript, and Bootstrap for responsive design.
- I worked on backend development with ASP.NET Core MVC and C#, implementing robust CRUD operations and ensuring data security with authentication and authorization.
- I managed MySQL databases, performing migrations and optimizations.

## PROJECTS

### SpCare (02/2024 - 07/2024)
- The SpCare project aims to develop a web application for managing various customer services, such as domains, emails, and SSL certificates.
- The frontend will use HTML, CSS, Bootstrap, and JavaScript, while the backend will leverage ASP.NET Core MVC with C# and MySQL for data management.
- Key features include notification filtering, a blog, service categories, reporting tools, subscription management, and robust authentication and authorization.

### CTMS (05/2024 - Present)
- The CTMS project aims to develop a web application to manage and track cylinders efficiently.
- The project will involve creating CRUD operations for services, handling Flutter migrations, and implementing various small tasks to enhance functionality.
- The technologies used will include HTML, CSS, Bootstrap, JavaScript for the frontend, and ASP.NET Core MVC with C# for the backend, with MySQL for data storage.
